Multicoloured Cablò lampshade 100 cm
Cable colors: White

Product short description:

A versatile, ecofriendly and creative lampshade. Introducing Cablò, a support in recycled plastic exclusively made and patented for Creative-Cables by Fabrizio Alessio, designer from Turin. Cable snippets that would otherwise go unused, looking for a new life. For a colourful and never boring lampshade.

Lozenge cables come in many different colourful tones, or you can keep it simple with a snowy white one. Either way, you will receive Cablò in the multicoloured version along with seven 100 cm fabric cables, that will help you create a lampshade to match your every mood; from intriguing geometrical figures to charming floral allure.

What's more, you will be able to mix&match your Cablò as many times as you like simply by switching up the order of the cable snippets: just open le due scocche in the support, and place them however you like in the designated slots. Thanks to the pressure cable-clamp built in the buttonhole you will be able to attach it to any cable, right above the lamp holder.

Product description:
