E27 wall or ceiling lamp holder for lampshade - IP44 Waterproof Finish: White

Description

Big results with a small product. The E27 lamp holder for lampshade is the perfect solution to light up any setting. Patented by Creative-Cables, this product is set apart by its **reduced dimensions** and **modern yet simple lines** which, paired with the lampshade will allow you to create striking lighting compositions to match your taste. No rose needed, and the E27 lamp holder can be directly mounted to any wall or ceiling.

Thanks to a **special membrane** that protects the inside layer, this product has a guaranteed IP44 Protection Degree which makes it suitable for outdoor use - under a canopy, on a patio or small terrace - or in the bathroom, near or above the mirror.

Where can this lamp holder be used?

This product's versatility makes it easy to use in various settings: kitchen, patio, canopy, entrance and so much more. The compact design and reduced dimensions make it easy to match in any space and with any lampshade.

Why should you use an E27 lamp holder?

The E27 lamp holder is amongst the most common on the market. This is partly owed to **its user-friendliness**: all

you'll need to do is secure the light bulb in the E27 fitting, and voilà! The light bulb will furtherly secured thanks to its screw shaped fitting which makes sure to firmly fasten it inside the lamp holder, greatly reducing the risk of accidental falls and damage.

Another advantage of the E27 lamp holder is the product's impressive **versatility**. The same lamp holder is compatible with various kinds of light bulbs, which make it perfect for use in a number of different occasions and limits the need of purchasing new accessories for every light bulb.

The E27 lamp holder is an **extremely affordable and widely sold** accessory.

What does IP44 Protection Degree mean?

The IP44 Protection Degree identifies the lamp holder for lampshade's protection degree against fine dust and humidity. The first digit states that the lamp holder is protected against solid objects bigger than 1 mm, whilst the second 4 means its protected from water splashes. Which means that this Creative-Cables lamp holder with is compatible with outdoor use and can sustain difficult weather conditions to an extent, but must not be directly exposed to rain.
